 - B. Vessel Allocations and Harvest

- III. BSAI Sideboards (Pg. 9)
 - A. BSAI Cod Sideboard Allocations
 - B. Cod Sideboard Transfers
 - C. Vessel Cod and PSC Harvest
 - D. Total Harvest - All BSAI Sideboard Species

- IV. Bering Sea Salmon Bycatch Management (Pg. 17)

- V. Gulf of Alaska Sideboards (Pg. 20)
 - A. GOA Sideboard Allocations
 - B. GOA Sideboard Harvest

I. Akutan Catcher Vessel Association

A. Cooperative Membership

Thirty seven member vessels made up the Akutan Catcher Vessel Association (ACVA) for the year 2012. The table below shows the ACVA member vessels and their associated Coop percentages. As in the past, Coop percentages listed represent the vessels share of the Coop pollock based on the relevant catch history of each member vessel. In addition to using these percentages for pollock distribution, the Coop percentages were also used for the purpose of allocating Coop costs down to the vessel level. The Trident Seafoods plant in Akutan, Alaska served as the primary purchasing and processing facility for the ACVA in 2012.

B. Cooperative Management

The Akutan Catcher Vessel Association is governed by a Board of Directors as well as through active participation by the owners and operators of the member vessels. The Akutan Catcher Vessel Assoc. remains very active in the inter-coop process and is bound contractually to the inter-coop through the Inter-Coop Agreement. Inter-coop issues and fishery management decisions are brought to the Coop level in the form of preferred alternatives. The preferred alternatives are a result of discussions and negotiations with the other Coops resulting in unanimous decisions by all Coop representatives. All preferred alternatives are discussed and voted on at the Coop level prior to being supported at the inter-coop level.

C. In-Season Management

The day to day management of the Coop is the responsibility of the Coop Manager. The Coop Manager is responsible for all communications with the fleet regarding Coop and inter-coop issues as well as providing all Coop information back to the vessel owners and managers. The Coop Manager also schedules all meetings, budgets and manages Coop costs and attends all inter-coop meetings.

In addition to the above duties, the Coop Manager is also responsible for all pollock and sideboard distribution as well as the in-season management of all pollock, sideboard fisheries and PSC. Prior to individual season openings, it is requested that the Coop members advise the Coop manager of their fishing plans. This is not a formal process but it provides the Coop Manager adequate information as to which vessels will participate in which fisheries prior to the fisheries commencing. During this process, member vessels are informed of allocations or sideboard restrictions and any other pertinent information that needs to be conveyed. As the fisheries proceed, landing data is obtained by the Coop Manager from the plant that received the catch and landing totals are tabulated and compared against allocations or sideboards in the pertinent area. Vessels keep updated on their allocation progress via direct communication with the Coop Manager. An update is also sent to the processor and the vessel owners on a regular basis. This process ensures that no allocation or sideboard limits are exceeded.

It is also the responsibility of the Coop Manager to complete all Coop reporting requirements as outlined by the Government. This includes the submission and reconciliation of all weekly reports and the compilation and completion of the annual report to the Council.

Transfers of allocation are used within and between Coops to allow for efficient use of our allocations. The Coop Manager is responsible for tracking all transfers and preparing any necessary paper work to facilitate the transfers. All completed transfers are then reported to the Coop via changes to the allocation spreadsheets that are distributed regularly. In many cases the Manager aids in the transfer process by identifying remaining allocations or fishing situations in which a transfer might be beneficial or requested by Coop members.

All landings data, including prohibited species catches, are also gathered by Sea State, Inc. Since the inception of AFA Coops, Sea State has been hired to act as a third party to aid in our fishery management. Harvest and bycatch data is obtained by Sea State via the NMFS eLandings program which is used at the plants, or via observer reports which are acquired through the observer program office in Seattle. This data allows Sea State to aid the Coop Manager with in-season management as needed. This service is used primarily to monitor the harvest of prohibited species and to facilitate the various bycatch programs put in place by the inter-coop group. All data gathered by Sea State is available to the Coop Manager via a password protected website. Data on the website is available in the aggregate or by individual vessel deliveries.

II. Akutan Catcher Vessel Association AFA Pollock

A. Cooperative Pollock Allocation

Based on the NMFS verified catch histories of its member vessels, the Akutan Catcher Vessel Association was allocated 32.263% of the pollock available for directed fishing by the Bering Sea onshore sector. This resulted in a 2012 Bering Sea pollock allocation of **170,686 MT**. This total allocation was distributed to member vessels based on their corresponding Coop percentage. Per the Coop agreement, 40% of their annual allocation was given to them in the “A” season and the balance in the “B” season.

B. Vessel Allocations and Harvest

Table 1 shows initial pollock allocations to the ACVA member vessels as well as the total harvest of pollock by member vessels. Table 2 shows the pollock harvest along with non-groundfish and PSC catch.

TABLE 1:

As indicated on this table in the bottom right hand corner, 3,027 MT of pollock was left unharvested in this Coop for 2012. This is mostly fish left from GOA exempt vessels that could not lease their fish as well as fish left due to the avoidance of chum and Chinook salmon bycatch.

As evident by looking the each vessel’s harvest compared to their allocations, many intra-coop transfers were made. Some of this is a result of vessels stacking their allocations to further rationalize the fishery. Many of these transfers were a direct result of specific operational plans during the “B” season fishery.

As you can see at the bottom of Table 1 two boats from outside the Coop were contracted to deliver fish on behalf of the ACVA. All of this fish was delivered to the Trident Plant in Akutan.

No member vessels in this Coop exceeded their annual allocation of BS pollock without approval of the Coop manager. Small overages do occur but were easily offset by the vessels that left small amounts unharvested.

TABLES 2 and 3 show total pollock catch and the associated PSC bycatch as well as sideboard bycatch in the directed pollock fishery.

III. BSAI Sideboards

A. BSAI Cod Sideboard Allocations

BSAI sideboard allocations were established for each AFA Coop for Pacific cod, Yellowfin sole and Rock sole. No vessels from the Akutan Catcher Vessel Association participated in the Bering Sea Yellowfin sole or Rock sole fishery in 2012. Coop sideboard allocations for Bering Sea flatfish have not been distributed to individual vessels in the Coop.

Based on the Sea State verified catch history of its member vessels, the ACVA was allocated 29.76% of the Bering Sea cod sideboards available to the AFA non-exempt fleet. This resulted in a total 2012 Pacific cod sideboard total of 10,929 MT to the Akutan non-exempt fleet. Seven member vessels in the ACVA were Bering Sea exempt cod boats in 2012.

B. Cod Sideboard Transfers

The middle column of Table 4 shows the cod transfers that were made for 2012 for the Akutan Catcher Vessel Association. There were no cod sideboard transfers in or out of the Akutan Coop in 2012.

C. Vessel Cod and PSC Harvest

Table 4 shows the cod Coop percentage for each of the non-exempt member vessels and their associated sideboard totals and harvest amounts for 2012. The bottom of the table also shows the Bering Sea cod exempt vessels and their associated cod landings for 2012. Table 5 shows the total cod sideboard harvest as well as the non-target groundfish and PSC harvest for both the exempt and non-exempt member vessels.

TABLE 4:

A total of 5,420 MT of non-exempt cod was left unharvested during 2012. As stated above, the total non-exempt sideboard allocation for 2012 after the transfers was 10,929 MT, of which, 50% was harvested. All of the cod harvest took place in the winter and spring during the January through April time frame. No member vessels participated in the cod fishery during the second half of the year.

As you can see by looking at each vessel's sideboard totals and harvest amounts, many intra-coop transfers were made. These transfers were the result of vessels stacking sideboards in order to allow vessels to finish pollock and others to harvest cod in the spring. All vessels that harvested amounts in excess of their own sideboard total did so under the direction of the Coop Manager.

A summary of the ACVA exempt vessel cod sideboard harvest can be seen at the bottom of Table 3.

TABLE 5:

PSC caps were established for halibut, Zone 1 red King crab as well as zone 1 Bairdi and Opilio. As the harvest data shows, PSC bycatch was once again low in 2012. A total of 48 MT, or 45%, of the Coop's non-exempt halibut mortality was used to harvest the non-exempt vessel's cod. The PSC catch for the exempt cod fleet is also seen in Table 4.

D. Total BSAI Sideboard Harvest

2012 American Fisheries Act catcher vessel sideboards have been established for most of the species or species groups in the BSAI. Coop sideboard allocations for the BSAI have only been established for Pacific cod, Yellowfin sole, and Rock sole. Table 6 below summarizes the Akutan Catcher Vessel Association harvest of all BSAI sideboard species for 2012. These data include the directed fishing for Pacific cod sideboards as well as the bycatch of all other sideboard species taken in both the pollock and cod directed fisheries in the BSAI.

IV. Bering Sea Salmon Bycatch Management

Chinook and Chum salmon Rolling Hotspot programs were once again in place for 2012 through the work of the inter-coop group. The Chinook and Chum Salmon Bycatch Agreements were adopted by all of the Coops. The overall goal of both programs is to provide to the fleet real-time bycatch data that can be used to avoid salmon hot spots and allow the harvest pollock with as little salmon bycatch as possible. Incorporated in to these programs were weekly closed areas affecting Coops that had shown high salmon bycatch, as defined in the agreement, over the previous couple of weeks.

Sea State was used to monitor the fishery and salmon bycatch performance by the Coops. Sea State was responsible for gathering the data, notifying the Coop Managers of bycatch rates by area as well as determining and announcing the weekly closures.

Vessels fishing for this Coop predominantly fished closer to Dutch and Akutan than did some of the other pollock Coops during this year. The goal of doing this is to bring the freshest possible fish to the plant. This allowed the plant flexibility with its products and insured that they can produce the highest quality product possible.

The Akutan Catcher Vessel Association has received no notices that we might have possible salmon closed area violations during 2012.

Table 7 below shows the number of salmon taken by species and season by vessels harvesting pollock for this Coop. In addition, Table 8 indicates the number of times vessels from this Coop appeared on the “dirty 20” list as determined by Sea State. Estimations of the number of salmon that may have been avoided by the efforts of this Coop and the Rolling Hotspot program are summarized in the collective catcher vessel IC report to the Council at the end of this document.

V. Gulf of Alaska Sideboards

A. GOA Sideboard Allocations

Sideboards were established for the major target fisheries in the Gulf of Alaska. For 2012, Sea State published informational tables with GOA sideboard percentages for each Coop's non-exempt vessels. Sideboard totals for each Coop were calculated by taking the Coop's percentage of the overall AFA sideboard for that area and species. Coop percentages are based on the relevant verified catch histories of member vessels.

Tables 8 and 9 show the Akutan Catcher Vessel Association 2012 non-exempt GOA sideboard limits for pollock and cod as well as any inter-coop transfers that took place during the year.

TABLE 9 and 10:

As stated above, these tables list the total sideboard amounts in MT by area and season based on a total of the member's catch histories. Inter-Coop transfers are noted in the middle column and total sideboards including transfers are at the right.

B. GOA Sideboard Harvest

Three vessels from the Akutan Catcher Vessel Association participated in GOA sideboard fisheries in 2012.

TABLE 10:

This table summarizes the GOA sideboard target species harvest for 2012. No sideboard limits were exceeded by this Coop for 2012. Any additional harvest of GOA species by ACVA member vessels was done on GOA exempt vessels.

TABLE 11:

Table 11 summarized the Akutan Coop's harvest of GOA sideboards and the Associated PSC harvest
