INTRODUCTION

UniSea Fleet Cooperative (UFC) is pleased to submit this document and results of their 2022 Bering Sea fishery to the North Pacific Fishery Management Council (NPFMC) in compliance with annual reporting requirements of the 1998 American Fisheries Act (AFA).

The 2022 fishing season was the twenty-second year of UFC operations under the AFA. The UniSea fleet was managed and operated during 2022 following the successful model established during the preceding 2000-2021 fisheries - basically without change. This document format and exhibits herein reporting UFC co-op members, management, allocations, catches, sideboard limits, prohibited species catches and enforcement is also consistent with UFC's earlier years reporting to the NPFMC. This report meets AFA reporting requirements and provides easy comparison to the prior year results.

UNISEA FLEET MEMBER VESSELS AND CO-OP MANAGEMENT

There were vessel management changes in 2022 compared to 2021. Mr. Jeb Towne replaced Mr. Bob Desautel as Managing Member for Dona Martita LLC. Seven individual members of the UFC representing 12 catcher vessels signed their Co-op Membership Agreement, which enabled them to operate under the laws of the AFA in a fishing cooperative delivering pollock to UniSea Inc. during the 2022 fishing season (Attachment 1, UniSea Fleet Cooperative Membership Agreement for 2022 dated 11/22/21, and Pollock Harvest Schedule). The F/V

Mar Gun did not fish in the Bering Sea in 2022. The 2022 member vessels and their owners are listed below:

Co-op management and administration continued during 2022 and remained similar to the prior co-op years (Exhibit 1). Coordination of information on allocations, transfers, pollock catches, sideboard catches and prohibited species catches between the UniSea plant in Dutch Harbor, the member vessels, Sea State, the Inter Co-op Manager and the National Marine Fisheries Service all continued during 2022 as established in year 2000 and as conducted in 2001-2021.

UFC BERING SEA POLLOCK ALLOCATION TRANSFERS AND CATCH

UFC 2022 pollock allocation represented 9.532% of the total Bering Sea final directed pollock allocation and 22.094% of the inshore sector allocation. Exhibit 2 shows the distribution of final 2022 pollock allocations between the seven inshore pollock cooperatives. UFC's allocation of 22.094% of the inshore sector allocation ranked UFC as the second largest inshore co-op. In 2022, UFC's 12 member vessels received a final AFA Bering Sea pollock allocation that totaled 104,991.7 mt (Exhibit 3). Each of the 12 UFC vessel's final pollock allocations are identified in Exhibit 3 showing their respective tonnage and each vessel's percentage of the UFC total allocation.

Exhibit 4 reports the final 2022 Bering Sea pollock allocations for each of the remaining and active 11 vessels in the UniSea fleet during the 2022 season after in-season transfers of pollock allocations between member vessels. One member vessel (*Mar Gun*) transferred all or nearly all of her 2022 pollock quota to other UFC member vessels.

Exhibit 5 provides UFC Bering Sea pollock catches that occurred during the 2022 season relative to final allocations after all co-op transfers. The UFC directed Bering Sea pollock catch totaled 104,954.463 mt, which was 37.245 mt less

than the final allocation. This catch equated to 99.96% utilization of the final 2022 Bering Sea pollock allocation.

The AFA cooperative agreements require that co-op member vessels deliver at least 90% of the co-op's Bering Sea pollock catch to their cooperative processor. During 2022, UFC member vessels deliveries were greater than 90% of all directed pollock deliveries by UFC member vessels, in keeping with AFA requirements. No pollock caught during UFC operations in 2022 was landed outside of Alaska.

Bycatch of other groundfish, herring, halibut, crab and salmon from the directed Bering Sea pollock fishery is detailed by member vessel in Exhibit 6. Pollock represented 99.67 % of the total catch of pollock plus all other groundfish in the directed pollock fishery.

Vessel-level detail of salmon bycatch in the directed Bering Sea pollock fishery is reported for UFC in 2022 to meet current reporting requirements under Amendment 110. Specifically, Exhibit 6 summarizes the seasonal (A and B) catches of Chinook and chum salmon (other salmon). Salmon bycatch measures were in effect under Amendment 110 continuing in 2022, which was implemented to improve the management of Chinook and chum salmon bycatch in the Bering Sea pollock fishery by creating a comprehensive salmon bycatch avoidance program, and UFC salmon bycatch was covered under the inshore Salmon Savings Incentive Plan Agreement (SSIP).

SIDEBOARD LIMITATIONS, ALLOCATIONS AND CATCHES

The laws of the AFA place limits on AFA qualified catcher vessels whereby their harvest of groundfish other than Bering Sea pollock is limited to historic levels. Halibut bycatch (PSC) is also limited through the co-op sideboard allocations. By AFA definition, all catch of groundfish sideboard species made by non-exempt AFA catcher vessels, whether as targeted catch or incidental catch, are to be

deducted from the sideboard limits. These are reported in the final harvest specifications and are intended to be a cap on all catches of these species.

Past UFC annual AFA pollock reports have provided details of sideboard allocation, transfers, catch and management (one table with details of BSAI sideboards and one table with details for GOA). Recent regulations detailed in the Federal Register (FR84 2723) are in effect since last year's report. Referencing those changes –“Rather than continue the annual process of calculating all sideboard limits and then closing most of the groundfish species with sideboard limits to directed fishing, the first action of this rule revises regulations to prohibit directed fishing by non-exempt AFA Program and CR Program vessels for those groundfish species and species groups subject to sideboard limits that have not been opened to directed fishing and that are not expected to be opened to directed fishing in the foreseeable future. Also, NMFS will now cease calculating and publishing each year the relevant sideboard limits subject to this final rule and their corresponding directed fishing prohibitions in the BSAI and GOA groundfish harvest specifications.” Under these continuing provisions adopted by NMFS, total catches of all species (including sideboard species) for UFC in 2022 are provided in Exhibit 11.

DIRECTED BERING SEA COD AND GULF POLLOCK FISHERY

UFC member vessels conducted a small directed Bering Sea cod fishery within UFC allocation (2,478 mt) during 2022. This fishery was conducted by four member vessels and yielded a harvest of 1,721 mt (Exhibit 7). UFC member vessels did not conduct a directed fishery for Gulf of Alaska pollock, and they did not conduct directed fisheries for yellowfin sole or rock sole.

Bycatch of other groundfish, halibut, herring, crab and salmon in the UFC directed Bering Sea cod fishery is detailed in Exhibit 8. Cod comprised 93.5% of the total groundfish catch in UFC's 2022 directed Bering Sea cod fishery.

As earlier noted, UFC member vessels did not fish Gulf of Alaska pollock in 2022 and there were no GOA pollock transfers in or out of UFC (Exhibit 9).

UFC PROHIBITED SPECIES AND ALL GROUND FISH CATCH TOTALS

UFC member vessel total prohibited species catches of halibut, herring, Bristol Bay red king crab, *bairdi* Tanner crab, other Tanner crab, chinook salmon and other salmon from all directed Bering Sea pollock and cod fisheries are provided in Exhibit 10. UFC member vessels' total catch (landings and discards) for all BSAI sideboard species by area and vessel is shown in Exhibit 11.

UFC MONITORING AND ENFORCEMENT

All UFC directed Bering Sea pollock and cod catches, as well as sideboard catches and the halibut PSC were successfully managed and did not exceed allocations. The co-op was accordingly not required to take any enforcement actions.
