Unified Cod Cooperative

2024 Annual Report to the North Pacific Fisheries Management Council

Submitted Match 25,2025

1. Introduction

The Pacific Cod Trawl Cooperative (PCTC) program was implemented in 2024 to facilitate the safe and efficient harvesting of Pacific Cod (P. Cod) by vessels employing non-pelagic trawl gear. Quota shares (QS) within the PCTC program are allocated based on historical legal landings of Pacific Cod from 2009 to 2019 for qualifying License Limitation Program (LLP) license holders. The PCTC program allocates only A season (January 20th to April 1st) and B season (April 1st to June 10th) Cooperative Quota (CQ), while the C season (June 10th to November 1st) remains a limited access fishery.

At the Council's request, the Pacific Cod Trawl cooperatives were asked to submit annual reports detailing cooperative membership, management practices, CQ leasing, the harvest of CQ from processor-held QS, and performance.

A. Aleutian Island Set-Aside

Under the PCTC program, cooperatives must set aside 12% of the annual P. Cod CQ for delivery to an Aleutian Islands shore plant in the event the cities of Adak or Atka file a notice of intent to process. The cooperatives will manage the Aleutian Islands CQ set aside through an intercooperative agreement. Neither city filed a notice of intent, and no Aleutian Islands set aside was required for 2024.

B. Cooperative Membership

The Unified Cod Cooperative (the "Cooperative") is comprised of 14 LLP harvester members and 3 associated processors, as illustrated in Exhibits 1 and 2. A total of 24 vessels are listed as Cooperative member vessels, as detailed in Exhibit 3.

C. Cooperative Management

The Cooperative employed a manager to assist in the successful harvest of CQ. The manager allocated CQ and associated Prohibited Species Catch (PSC) to vessels using cooperative percentages determined by member QS units. The manager's responsibilities included communicating information between member vessels and processors, maintaining a delivery schedule, and prioritizing bycatch reduction to optimize resource utilization. The Cooperative manager collaborated individually with vessels to ensure they stayed within their seasonal allocations and facilitated any transfers of P. Cod and PSC between cooperatives.

Exhibit 5. 2024 Unified Cod Cooperative Harvester and Processor CQ

	A Season	B Season	Total
Harvester Based CQ	3498.977	441.61	3940.587
Processor Based CQ	681.52	86.02	767.534
	4180.496	527.625	4708.121

D. Inter-Cooperative Lease

In 2024, a total of 43.98 metric tons (MT) of P. Cod and 3.1 MT of Pacific Halibut (P. Halibut) PSC were transferred from the Cooperative to the Akutan Cooperative. The Akutan Cooperative transferred 104.217 MT of A season and 13.153 MT of B season P. Cod CQ to the Cooperative. Associated PSC was also transferred from the Akutan Cooperative (Exhibit 6).

Exhibit 6. 2024 Intercooperative Transfers

Transferor	Transferee	Pacific Cod (MT)	COD SEASON	Halibut PSC (MT)	Red King Crab	C. Opilio COBLZ	Zone 1 C. Bairdi (#)	Zone 2 C. Bairdi (#)

Akutan Coop	Unified Cod Coop	13.153	В	0.134		15	16	133
Unified Cod Coop	Akutan Coop	43.998	Α	3.1				

E. Harvest of CQ from Processor-Held QS

To receive quota shares within the PCTC program, harvesters must join, and processors must associate with a cooperative. Of the total annual PCTC Quota, 77.5% is derived from harvester QS, while the remaining 22.5% originates from processor QS. Cooperatives are issued CQ for the A and B seasons, with any unused A season CQ rolling over to the B season. Exhibit 7 illustrates the catch of harvester- and processor-based CQ by the Cooperative in 2024.

Exhibit 7. 2024 Unified Cod Cooperative Harvester and Processor P. Cod CQ Catch.

^{*}All data pulled from Sea State and EFish cooperative accounts

^{**} Data shows catch from A season, no fishing occurred in B season of 2024

F. Cooperative Performance

Prohibited Species Catch limits are allocated to the cooperatives on an annual basis, as determined by their respective percentage of the total annual CQ. Management of PSC limits takes place at the cooperative level, with the Cooperative further allocating PSC to individual vessels to ensure equitable opportunities for CQ harvesting. Exhibit 8 presents the Cooperative's total PSC limits and catch for 2024. No fishing took place during B season of 2024. All deliveries in 2024 were observed, and no overages or penalties occurred for the Unified Cod Cooperative.

Exhibit 8. Unified Cod Cooperative 2024 Annual PSC Limits and Catch
