C-2 Changes to the Central GOA Rockfish Demonstration Pilot Program
Council Motion
October 7, 2004

Not include the non-trawl sector from the primary program by deleting the following provisions:
  • “Option 3. Non trawl catcher vessel” from section 3.1
  • “by any gear type” from the third bullet in section 3.3

Sideboard Provisions
General Provisions:
There are no exemptions from sideboards, except for CP vessels which opt out of the pilot program.

a. For fisheries that close on TAC in the GOA, the qualified vessels in each sector (trawl CV and trawl CP) would be limited, in aggregate, in the month of July to the historic average total catch of those vessels in the month of July during the qualification years 1996 to 2002. Fisheries that this sideboard provision would apply to include West Yakutat rockfish and WGOA rockfish.

b. For flatfish fisheries in the GOA that close because of halibut bycatch, the qualified vessels in each sector (trawl CV and trawl CP) would be limited, in the aggregate, in the month of July to the historic average halibut mortality taken by those vessels in the target flatfish fisheries in the month of July by deep and shallow complex.

c. In the event that one or more target rockfish fisheries are not open, sideboard restrictions will not apply for those target allocations.

- IFQ halibut and sablefish are exempt from sideboard provisions

CP Specific Sideboard Provisions:
CP vessels may decide to opt out of the CGOA pilot program on an annual basis. These CP vessels may not target POP, Northern rockfish or Pelagic Shelf rockfish in the CGOA in the years they choose to opt out. They may retain these species up to the MRA amount in other fisheries. They will be sideboarded at the sector level in the GOA as referenced in a and b above, but will not be subject to other sideboard restrictions within their sector.

Option 1 -The history of CP vessels which opt out will remain with the sector.
Option 2 -The history of CP vessels which opt out will be distributed pro-rata between sectors.

Opting out is an annual decision. CP vessels which choose to opt out must so notify NMFS. The decision to opt out should not in any way alter the status of their catch history for future rationalization programs.

For the CP sector, the pilot program fishery will start at the same time as the open access fisheries (in July). CPs which qualify for the CGOA rockfish pilot program, and which do not choose to opt out, are required to harvest 90% of their CGOA rockfish allocation, or to participate in the target rockfish fishery in the CGOA for two weeks (whichever is shorter) before participating in any other BSAI or GOA groundfish fishery. A vessel which has met this requirement can then move into the BSAI or GOA open access fisheries without limitation or restriction, except at the sector level in the GOA as referenced in the CV/CP inter-sector sideboards.
History may be consolidated between vessels, however each individual vessel that transfers its history to another CP or CV must still refrain from operating in any other BSAI or GOA groundfish fishery until 90% of all of the rockfish allocation on the stacked vessel is harvested in the CGOA, or for two weeks (whichever is shorter).

**Option:** three week stand-down (in place of two week stand-down)

**CV Specific Sideboard Provisions:**
- The qualifying vessels in the trawl CV sector cannot participate in the directed yellowfin sole, other flatfish (flathead, etc) or Pacific Ocean perch fisheries in the BSAI in the month of July.
- Qualifying vessels in the trawl CV sector would be limited, in aggregate, in the month of July, to the historic average total catch of those vessels in the BSAI Pacific cod fishery in July during the qualification years 1996 to 2002.
- AFA CVs qualified under this program are subject to the restraints of AFA sideboards and their coop agreement, and not subject to additional sideboards under this program.

**Set Asides**

**1.2 Entry level fishery:** A percentage of POP, Northern rockfish and pelagic shelf rockfish for catcher vessels not eligible to participate in the program, as mandated in the Congressional language. **For the duration of this program, the annual set aside will be 5% of each of these target rockfish species.**

- Allocations shall be apportioned between trawl and non-trawl gear:
  - Option 1. 50/50
  - Option 2. proportional to the number of applications received
  - Option 3. proportional to the number of applications received taking into account the harvest capability of the different gear types.

- The Council will develop a method for rolling over an allocation to the other entry level sector, in the event a sector is unable to harvest its allocation.
  - Suboption: the rollover from any sector will occur at the end of the third quarter.
- Prosecution of the entry level fishery will be supported by general allocations of PSC to the gear type not allocated under 3.3.1.3 and the general allocations of secondary species not allocated under 3.3.1.2.

**2.4 NMFS will determine:**

- Whether limits need to be imposed on vessel participation
- If limits need to be imposed, determine the appropriate number of vessels that would be allowed to fish in the entry level fishery
  - Suboption: Equal share distributions to the vessel applicants **by sector**
  - Suboption: Limited access competitive fishery **by sector**
- Entry permits are non-transferrable and must be fished by the named vessel

**5.4 CV sector**

The last three bullets for alternative 2 will be modified to read:

- Catcher vessel cooperatives are required to have at least **5-10** eligible LLPs
- Coops may engage in inter cooperative transfers of annual allocations to other cooperatives with agreement of the associated qualified processor
- **No processor associations required by co-ops.**
NORTH PACIFIC FISHERY MANAGEMENT COUNCIL
CENTRAL GULF OF ALASKA ROCKFISH PILOT PROGRAM
Council Motion
Updated to October 13, 2004

PROBLEM STATEMENT

The present management structure of the CGOA rockfish fishery continues to exacerbate the race for fish with:

- Increased catching and processing capacity entering the fishery,
- Reduced economic viability of the historical harvesters (both catcher vessels and catcher processors) and processors,
- Decreased safety,
- Economic instability of the residential processor labor force,
- Reduced product value and utilization,
- Jeopardy to historical groundfish community stability,
- Limited ability to adapt to Magnuson-Stevens Act (MSA) requirements to minimize bycatch and protect habitat.

While the Council is formulating GOA comprehensive rationalization to address similar problems in other fisheries, a short-term solution is needed to stabilize the community of Kodiak. Kodiak has experienced multiple processing plant closures, its residential work force is at risk due to shorter and shorter processing seasons and the community fish tax revenues continue to decrease as fish prices and port landings decrease. Congress recognized these problems and directed the Secretary in consultation with the Council, to implement a pilot rockfish program with the following legislation:

SEC. 802. GULF OF ALASKA ROCKFISH DEMONSTRATION PROGRAM. The Secretary of Commerce, in consultation with the North Pacific Fishery Management Council, shall establish a pilot program that recognizes the historic participation of fishing vessels (1996 to 2002, best 5 of 7 years) and historic participation of fish processors (1996 to 2000, best 4 of 5 years) for pacific ocean perch, northern rockfish, and pelagic shelf rockfish harvested in Central Gulf of Alaska. Such a pilot program shall (1) provide for a set-aside of up to 5 percent for the total allowable catch of such fisheries for catcher vessels not eligible to participate in the pilot program, which shall be delivered to shore-based fish processors not eligible to participate in the pilot program; (2) establish catch limits for non-rockfish species and non-target rockfish species currently harvested with pacific ocean perch, northern rockfish, and pelagic shelf rockfish, which shall be based on historical harvesting of such bycatch species. The pilot program will sunset when a Gulf of Alaska Groundfish comprehensive rationalization plan is authorized by the Council and implemented by the Secretary, or 2 years from date of implementation, whichever is earlier.

The fishing fleets have had little experience with cooperative fishery management and needs to begin the educational process. For the fishery to be rationalized all aspects of the economic portfolio of the fishery needs to recognized. To stabilize the fishery economy all the historical players – harvesters (both catcher vessels and catcher processors) and processors need to be recognized in a meaningful way. The demonstration program is designed as a short-term program for immediate economic relief until comprehensive GOA rationalization can be implemented.

Alternatives, Elements and Options

The Council recommends the following elements and options for the CGOA Rockfish Pilot program be included for analysis:

Catcher Vessel Alternatives
1) Status Quo
2) Cooperative program with license limitation program for processors
3) Cooperative program with cooperative/processor associations
Catcher Processor Alternatives

1) Status Quo
2) Cooperative Program
3) Sector Allocation

Alternatives 2 and 3 are defined by the following elements and options. Differences in the elements and options between the two alternatives and across the two sectors are noted.

1. Set-asides

Prior to allocation of catch history to the sectors, NMFS shall set aside:

1.1 ICA: An Incidental Catch Allocation (ICA) of POP, Northern rockfish and pelagic shelf rockfish to meet the incidental catch needs of fisheries not included in the pilot program.

1.2 Entry Level Fishery: A percentage of POP, Northern rockfish and pelagic shelf rockfish for catcher vessels not eligible to participate in the program, as mandated in the Congressional language. For the duration of this program, the annual set aside will be 5% of each of these target rockfish species.

- Allocations shall be apportioned between trawl and non-trawl gear:
  - Option 1. 50/50
  - Option 2. proportional to the number of applications received

- The Council will develop a method for rolling over an allocation to the other entry level sector, in the event a sector is unable to harvest its allocation.
  - Suboption: The rollover from non-trawl to trawl will occur at the end of the third quarter.

- Prosecution of the entry level fishery will be supported by general allocations of PSC to the gear type not allocated under 3.3.1.3 and the general allocations of secondary species not allocated under 3.3.1.2

2. Entry-Level Fishery

2.1 Catcher Vessel Participation:
Vessels that can participate in the Entry Level fishery are those vessels that did not qualify for the CGOA rockfish pilot program.

2.2 Processor Participation:
Processors who purchase and process the entry level rockfish quota must be non-qualified processors.

2.3 Fishery participation:
Before the beginning of each fishing year an application must be filed with NMFS by the interested vessel that includes a statement from a non-qualified processor confirming an available market.

2.4 NMFS will determine:
- Whether limits need to be imposed on vessel participation
- If limits need to be imposed, determine the appropriate number of vessel that would be allowed to fish in the entry level fishery
  - Suboption: Equal shares distributions to the vessel applicants by sector
  - Suboption: Limited access competitive fishery by sector
- Entry permits are non-transferable and must be fished by the named vessel
3 Sector Allocations

3.1 Sector Definitions
   Option 1. Trawl catcher vessel
   Option 2. Trawl catcher processor
   A trawl catcher-processor is a trawl vessel that has a CP LLP license and that processes its catch on board.

3.2 Rationalized Areas
   • History is allocated for the CGOA only (NMFS statistical areas 620 and 630)

3.3 Sector Allocations
   • Catch history is determined by the sector qualified catch in pounds as a proportion of the total qualified catch in pounds.
   • Sector allocation is based on individual qualified vessel histories with the drop-2 provision at the vessel level.
   • The eligibility for entry into the program is one targeted landing of POP, Northern rockfish or PSR caught in CGOA during the qualifying period.
   • The CP catch history will be based on WPR data.

3.3.1 Each sector is allocated catch history based on:
   Option 1. The sum of all catch history of vessels in that sector for the years 1996-2002, drop two, whether the vessels earned a CGOA LLP endorsement or not.
   Option 2. The sum of all catch history of vessels in that sector for which it earned a valid, permanent, fully transferable CGOA LLP endorsement, for the years 1996-2002 drop two.
   Suboption: include history of vessels which hold a valid interim endorsement on implementation of the program

3.3.1.1 Target species:
   • Qualified target species history is allocated based on retained catch (excluding meal)
   • History will be allocated to each sector for POP, Northern rockfish and PSR caught in CGOA based on retained catch during the open season
   • Different years may be used for determining the history of each of the three rockfish species.
   • Full retention of the target rockfish species required

3.3.1.2 Secondary species:
   • Secondary species history is allocated based on
     a) total catch
     b) retained catch
     while targeting the primary rockfish species listed above.
   • History will be allocated to each sector for sablefish, shortraker/rougheye rockfish, thornyheads and Pacific cod.
     Participants must retain all allocated secondary species and stop fishing when cap is reached.
     Options for Pacific cod.
     Option 1. Allocations of Pacific cod as a secondary species will be at the following rate of harvest history:
       a. 100 percent
       b. 90 percent
       c. 80 percent
d. 70 percent

Option 2. Pacific cod history will be managed by MRA for vessels that fish on the offshore pcod quota

- All non-allocated secondary species will be managed by MRA, as in the current regime. This includes Arrowtooth flounder, deep water flatfish, shallow water flatfish, flathead sole, rex sole, pollock, other species, Atka mackerel and other rockfish.

- Secondary species allocations will be based on:
  Option 1) Catch by sector of the secondary species caught while targeting rockfish divided by the catch of secondary species by all sectors over the qualifying period. The calculated percentage is multiplied by the secondary species quota for that fishery year and allocated to each sector in the pilot program. (analyze total and retained catch)
  Option 2) Percentage of catch by sector of the secondary species within the rockfish target fisheries divided by the total number of years in the qualifying period. The calculated percentage is multiplied by the secondary species quota for that fishery year and allocated to each sector in the pilot program. (analyze total and retained catch)

3.3.1.3 Prohibited species (halibut mortality):

- Allocation to the pilot program will be based on historic average usage, calculated by dividing the total number of metric tons of halibut mortality in the CGOA rockfish target fisheries during the years ’96-’02 by the number of years (7). This allocation will be divided between sectors based on:
  Option 1) The actual usage of each sector
  Option 2) The relative amount of target rockfish species allocated to each sector.

4. Allocation from Sector to Vessel

4.1 Within each sector, history will be assigned to LLP holders with CGOA endorsement that qualify for a sector under the ‘sector allocations’ above. The allocations will be to the current owner of the LLP of the vessel which earned the history.

4.2 Basis for the distribution to the LLP license holder is: the catch history of the vessel on which the LLP license is based and shall be on a fishery-by-fishery basis. The underlying principle of this program is one history per license. In cases where the fishing privileges (i.e., moratorium qualification or LLP license) of an LLP qualifying vessel have been transferred, the distribution of harvest shares to the LLP shall be based on the aggregate catch histories of (1) the vessel on which LLP license was based up to the date of transfer, and (2) the vessel owned or controlled by the LLP license holder and identified by the license holder as having been operated under the fishing privileges of the LLP qualifying vessel after the date of transfer. (Only one catch history per LLP license.)

4.2.1 Persons who have purchased an LLP, with a CGOA endorsement to remain in the fishery may obtain a distribution of harvest share on the history of either the vessel on which the LLP is based or on which the LLP is used, not both. License transfers for purposes of combining LLPs must have occurred by April 2, 2004.

4.3 Target species:
Each LLP holder will receive an allocation of history equivalent to their proportion of the total of the sector qualifying history.
4.4 Secondary species:
Each LLP holder will receive an allocation of sector history proportional to their allocation of target rockfish history

4.5 PSC (halibut mortality)
- Each LLP holder will receive an allocation of halibut mortality equivalent to their proportion of the sector rockfish history

4.6 Allocations of secondary species:
Option 1) Must be fished in conjunction with the primary species allocations.
   (Compliance monitored at offload)
Option 2) May be fished independently of the primary species allocations.

5 Co-op provisions

5.1 Duration of cooperative agreements is 2 years.

5.2 For all sectors
- The co-op membership agreement and the Contract will be filed with the RAM Division. The Contract must contain a fishing plan for the harvest of all co-op fish.
- Co-op members shall internally allocate and manage the co-op’s allocation per the Contract.
- Subject to any harvesting caps that may be adopted, allocated history may be transferred and consolidated within the co-op to the extent permitted under the Contract.
- The Contract must have a monitoring program. Co-op members are jointly and severally responsible for co-op vessels harvesting in the aggregate no more than their co-op’s allocation of rockfish species, secondary species and PSC mortality, as may be adjusted by inter-co-op transfers.
- Co-ops may adopt and enforce fishing practice codes of conduct as part of their membership agreement.
- Co-op membership agreements shall allow for the entry of other eligible harvesters into the co-op under the same terms and conditions as agreed to by the original agreement.
- Co-ops will report annually to the Council as per AFA.

5.3 CP sector:
History is allocated to the current owner of the LLP of the vessel that earned the history.
- Owners may fish their allocation independently if the LLP has a CGOA endorsement, or may enter into a cooperative arrangement with other owners.
- More than one co-op may form within the sector
- Any number of eligible LLPs may form a co-op
- Allocations may be transferred between co-ops of at least:
  Option 1: two LLPs
  Option 2: three LLPs

5.4 CV sector:
For Alternative 2:
- Voluntary co-ops may form between eligible harvesters.
- All cooperative harvests under this program must be delivered to eligible processors.
- Harvesters may elect not to join a co-op, and continue to fish in an LLP/Open Access fishery. Those LLPs that opt out of the cooperative portion of the pilot program will be penalized 0 to 20% of their historical share (annual allocation). The penalty share will be left with the CV cooperative portion of the rockfish fishery and will be prorated among CV cooperatives based on cooperative share holdings. The LLP’s remaining share will be fished in a competitive fishery
open to rockfish qualified vessels who are not members of a cooperative and must be delivered to one of the qualified processors.

- An eligible processor is a processing facility that has purchased 250 MT of aggregate Pacific Ocean Perch, Northern Rockfish, and Pelagic Shelf rockfish harvest per year, for 4 years, from 1996 to 2000. Eligible processors will be issued a license under this program. Licenses are not transferable.

- If a processing facility has closed down and another processing facility has acquired that processing history through purchase, for the purpose of determining processor eligibility the history belongs to the facility that purchased that history. That history can only be credited to another facility in the community that it was generated in for purposes of establishing eligibility under this program.

  Option. When owner and operator are not affiliated, the license will be issued to the owner and operator, but the operator will receive the right to vessel coop linkages.

  • The harvesters that enter into a co-op membership agreement shall be the members of the co-op.
  • A pre-season Contract between eligible, willing harvesters is a pre-requisite to a cooperative receiving an annual allocation.
  • Co-op membership agreements will specify that processor affiliated harvesters cannot participate in price setting negotiations except as permitted by general antitrust law.
  • Catcher vessel cooperatives are required to have at least 5-10 eligible LLPs
  • Co-ops may engage in inter-cooperative transfers of annual allocations to other cooperatives.
  • No processor associations required by co-ops.

For Alternative 3:

- Voluntary co-ops may form between eligible harvesters in association with processors.
- Catcher vessel co-ops must be associated with an eligible processor.
- An eligible processor is a processing facility that has purchased 250 MT of aggregate Pacific Ocean Perch, Northern Rockfish, and Pelagic Shelf rockfish harvest per year, for 4 years, from 1996 to 2000.
- A harvester is eligible to join a cooperative in association with the processing facility to which the harvester delivered the most pounds of the three rockfish species combined during the year’s 1996 – 2000 (processor chooses the year to drop, same year for all LLPs)
- Harvesters may elect not to join a co-op, and continue to fish in an LLP/Open Access fishery. Those LLPs that opt out of the cooperative portion of the pilot program will be penalized 0 to 20% of their historical share (annual allocation). The penalty share will be left with the LLP’s associated cooperative. The LLP’s remaining share will be fished in a competitive fishery open to rockfish qualified vessels who are not members of a cooperative and must be delivered to one of the qualified processors.
- If a processing facility has closed down and another processing facility has acquired that processing history through purchase, the history belongs to the facility that purchased that history. That history must remain in the community that it was generated in.

  Option. When owner and operator are not affiliated, the license will be issued to the owner and operator, but the operator will receive the right to vessel coop linkages.

- The harvesters that enter into a co-op membership agreement shall be the members of the co-op. The processor will be an associate of the cooperative but will not be a cooperative member.
- A pre-season Contract between eligible, willing harvesters in association with a processor is a pre-requisite to a cooperative receiving an annual allocation.
- Co-op membership agreements will specify that processor affiliated harvesters cannot participate in price setting negotiations except as permitted by general antitrust law.
- Processors are limited to 1 co-op per plant.
- Catcher vessel cooperatives are required to have at least:
  a) 50-75 percent of the eligible historical shares for each co-op associated with its processor
b) Any number of eligible harvesters (allows single person co-op)

- Co-ops may engage in inter-cooperative transfers of annual allocations to other cooperatives with agreement of the associated qualified processor.

5.5 CP Transfer provisions

CP annual allocations may be transferred within co-ops and between co-ops with at least:
- Option 1: two LLPs each (with CGOA endorsements)
- Option 2: three LLPs each (with CGOA endorsements)

5.6 Sector Transfer provisions

CP annual allocations may be transferred to CV cooperatives. CV annual allocations may not be transferred to CP cooperatives.

All transfers of annual allocations would be temporary and history would revert to the original LLP at the beginning of the next year.

A person holding an LLP that is eligible for this program may transfer that LLP. That transfer will effectively transfer all history associated with the LLP and any privilege to participate in this program that might be derived from the LLP.

6  Co-op harvest use caps

6.1 CV co-ops:

- Control of harvest share by a CV co-op shall be capped at:
  - Option 1. 30% of aggregate POP, Northern Rockfish and PSR for the CV sector
  - Option 2. 40% of aggregate POP, Northern Rockfish and PSR for the CV sector
  - Option 3. 50% of aggregate POP, Northern Rockfish and PSR for the CV sector
  - Option 4. No cap

6.2 CPs:

- Control of harvest share by a CP shall be capped at:
  - Option 1: 50% of aggregate POP, Northern Rockfish and PSR for the CP sector
  - Option 2: 60% of aggregate POP, Northern Rockfish and PSR for the CP sector
  - Option 3: 75% of aggregate POP, Northern Rockfish and PSR for the CP sector
  - Option 4: No cap

Eligible CPs will be grandfathered at the current level

7  Shoreside processor use caps

- Shoreside processors shall be capped at the entity level.
  - No processor shall process more than:
    - Option 1. 30% of aggregate POP, Northern Rockfish and PSR for the CV sector
    - Option 2. 40% of aggregate POP, Northern Rockfish and PSR for the CV sector
    - Option 3. 50% of aggregate POP, Northern Rockfish and PSR for the CV sector
    - Option 4. No cap

Eligible Processors will be grandfathered.

8  Program Review

Program review the first and second year after implementation to objectively measure the success of the program, including benefits and impacts to harvesters, processors and communities. Conservation benefits of the program would also be accessed.
9 Sideboards

9.1 General Provisions

There are no exemptions from sideboards, except for CP vessels which opt out of the pilot program.

a. For fisheries that close on TAC in the GOA, the qualified vessels in each sector (trawl CV and trawl CP) would be limited, in aggregate, in the month of July to the historic average total catch of those vessels in the month of July during the qualification years 1996 to 2002. Fisheries that this sideboard provision would apply to include West Yakutat rockfish and WGOA rockfish.

b. For flatfish fisheries in the GOA that close because of halibut bycatch, the qualified vessels in each sector (trawl CV and trawl CP) would be limited, in the aggregate, in the month of July to the historic average halibut mortality taken by those vessels in the target flatfish fisheries in the month of July by deep and shallow complex.

c. In the event that one or more target rockfish fisheries are not open, sideboard restrictions will not apply for those target allocations.

- IFQ halibut and sablefish are exempt from sideboard provisions

9.2 CP Specific Sideboard Provisions

CP vessels may decide to opt out of the CGOA pilot program on an annual basis. These CP vessels may not target POP, Northern rockfish or Pelagic Shelf rockfish in the CGOA in the years they choose to opt out. They may retain these species up to the MRA amount in other fisheries. They will be sideboarded at the sector level in the GOA as referenced in a and b above, but will not be subject to other sideboard restrictions within their sector.

Option 1 -The history of CP vessels which opt out will remain with the sector.
Option 2 -The history of CP vessels which opt out will be distributed pro-rata between sectors.

Opting out is an annual decision. CP vessels which choose to opt out must so notify NMFS. The decision to opt out should not in any way alter the status of their catch history for future rationalization programs.

For the CP sector, the pilot program fishery will start at the same time as the open access fisheries (in July). CPs which qualify for the CGOA rockfish pilot program, and which do not choose to opt out, are required to harvest 90% of their CGOA rockfish allocation, or to participate in the target rockfish fishery in the CGOA for two weeks (whichever is shorter) before participating in any other BSAI or GOA groundfish fishery. A vessel which has met this requirement can then move into the BSAI or GOA open access fisheries without limitation or restriction, except at the sector level in the GOA as referenced in the CV/CP inter-sector sideboards.

History may be consolidated between vessels, however each individual vessel that transfers its history to another CP or CV must still refrain from operating in any other BSAI or GOA groundfish fishery until 90% of all of the rockfish allocation on the stacked vessel is harvested in the CGOA, or for two weeks (whichever is shorter).

Option: three week stand-down (in place of two week stand-down)
9.3 CV Specific Sideboard Provisions

- The qualifying vessels in the trawl CV sector cannot participate in the directed yellowfin sole, other flatfish (flathead, etc) or Pacific Ocean perch fisheries in the BSAI in the month of July.
- Qualifying vessels in the trawl CV sector would be limited, in aggregate, in the month of July, to the historic average total catch of those vessels in the BSAI Pacific cod fishery in July during the qualification years 1996 to 2002.
- AFA CVs qualified under this program are subject to the restraints of AFA sideboards and their coop agreement, and not subject to additional sideboards under this program.

In the event this program has a duration of more than 2 years, the Council will reconsider the issue of use/ownership caps for companies and vessels.

**Alternative 3 for the CP Sector**

As a separate alternative, the CP sector could choose to fish its sector allocation under the current management regime, with the rockfish fishery starting on July 1st.
