[Motion passed 13/1]

The AP believes that RPA 4 allows for a more effective adaptive management opportunity. Allowing selective fisheries to occur in areas of lower concern provides the potential to contrast the effect of fishing on Steller sea lion stocks. We strongly encourage NMFS and all other sources of cooperative research to fund and develop plans to closely monitor and analyze changes in fisheries and sea lion stocks that may lead to a better understanding of the reasons for change in sea lion stock size throughout the range of the Western DPS.
